

## Designing for the Future with Beaches Habitat for Humanity

At The Lane Group, we believe our designs are more than just buildings. They are homes, parts of a community or steps towards a greater, aspirational movement and, in the case of our recent design contribution to Beaches Habitat for Humanity, sometimes all of the above.

We were pleased to combine green, energy-efficient design principles with sustainable materials to create a multi-family home that will one day bring the hope of a better future for both deserving families and our environment alike.

Our challenge was to accomplish this effort into a 35' wide footprint so that a two story duplex, with each unit maintaining it's own sense of identity, would fit onto the 50' wide lots located throughout the beaches area.

Thank you to the leaders and volunteers at Beaches Habitat for Humanity for being our partners in this effort and allowing us to do what we love for such a worthy cause.

*Enduring Design. Inspired Detail.*
